(a) Real outcomes, 90% target
(b) Real outcomes, 80% target
Worst excess, all or small hospitals (percentage points)
n_0 = 19
n_0 = 10
Patients flagged in the smallest third of hospitals (%)
Shrinkage (n_0 pseudo-deaths)
Empirical Bayes, all hospitals (η)
Donor hospitals (M)
Empirical Bayes, donors (η)
Pooled threshold
Local threshold
